PRODUCT DATA SHEET

HISTOLOGY INFILTRATING WAX

(PHC9054)

Highly purified “Fine cut” histology grade paraffin wax without additives formulated for general infiltration and embedding procedures. This product has the benefit of a low congealing point (54-56°) providing excellent infiltration characteristics combined with low cutting resistance which resists compression and tissue distortion during sectioning.

Congealing point	54 - 56°C
Visual	Free flowing white pellets
Flocculation (48hrs @ 63.0°C)	Complies with PHC flocculation test.

Available in 1Kg, 2Kg, 2.5Kg bags/pouches as well as 10Kg cartons and 20Kg bags.

This is a general guide for reference purposes only. Please contact us quoting the PHC reference number for detailed specifications.
