PRODUCT DATA SHEET

HISTOWAX HIGH MELT POINT

(PHC9060)

Highly purified higher melt point paraffin wax which has been double filtered and blended with synthetic polymers formulated for use in hotter climates and higher ambient working temperatures.

This wax is designed to be resistant to section wrinkles and wax block softening during the sectioning process.

Suitable for both general infiltration and embedding and ideal when using a sliding microtome.

Congealing point	58 - 60°C
Visual	Free flowing white pellets
Flocculation (48hrs @ 63.0°C)	Complies with PHC flocculation test.

Available in 1Kg, 2Kg, 2.5Kg bags as well as 10Kg and 25Kg cartons.

This is a general guide for reference purposes only. Please contact us quoting the PHC reference number for detailed specifications.
