

CARNAUBA WAX TYPE 4 (PHC 2483)

Fatty Grey Carnauba Wax Type 4 is a dark brown vegetable wax produced from harvesting the oldest leaves of the Copernicia Cerifera palm tree found in North East Brazil. Used for its dark colour in the polish and printing industry, Carnauba Type 4 is traditionally used for the manufacture of carbon paper, dark leather and shoe polishes, as well as some printing inks. Carnauba Type 4's hard nature makes it ideal for use in Thermal Transfer Ribbon and as a binding component for brake pad manufacture. Available in flake form. Packaging: 25 Kilo cartons/bags.

MP: 80 -88°C AV: not greater than 12 mg KOH/g INCI: COPERNICIA CERIFERA CERA
TOTAL ASH: less than 0.50% SV: 72 – 95 mg KOH/g
