

## UNBLEACHED CANDELILLA WAX (PHC 3334)

Unbleached Candelilla wax is derived from the shrub *Euphorbia Cerifera* native to Northern Mexico. Candelilla Wax consists of mainly hydrocarbons, esters and resins. It is insoluble in water but soluble in many organic solvents. It has good hardness and gloss but is not crystalline in structure. Crude Candelilla is unbleached, light brown in colour and popular within the precision casting industry and can be used as a substitute for Carnauba Wax in certain applications. It can also be used in sealing wax, leather dressings and adhesives.
