

NATURAL HYDROCARBON WAX SUBSTITUTE (PHC RD903)

A blend of plant derived waxes and esters formulated to act as a replacement for hydrocarbon waxes in cosmetic formulations. Can be used to improve consistency and gel forming. Due to its low melting point, RD 903 is ideal as an alternative to paraffin wax treatments at spas and nail salons. Colour and fragrance can be added.

Available: slab form. Packaging: 25 Kilo bags/cartons

CP: 43-47°C

PEN: 7-12 dmm

MP: 44-48°C
