Rapeseed & Coconut Container Wax 3441

Rapeseed & Coconut Container Wax 3441 is UK made from European produced vegetable waxes. White in colour with a low melting point but quite hard to the touch. Easy to work with and produces a smooth surface finish. A very clean burning, non-cracking wax with great scent throw and a recommended fragrance loading of 8% - 10%. No GMO origin materials and palm free and 100% natural.

Rapeseed & Coconut Container Wax 3441 is easy to use, clean burning, non-cracking product with sound environmental credentials and a great scent throw.

INSTRUCTIONS FOR USE

1. Melt the wax to 10-15°C above melting point (see product info for melting point)
2. It is important to check that the wax is completely melted and transparent
3. After melting cool down to 50 - 60°C (+/- 5°C)
4. Pour into container
5. One or two pours may be required or some light surface heating
6. Allow to cure before burning

FACTORS INFLUENCING THE FINISHED LOOK OF THE CANDLE

Heating Temperature

If the wax has not been completely melted (completely transparent) crystallisation may cause frosting

Pouring Temperature rying the pouring temperature can cause changes in appearance after cooling

Containers and moulds need to be at ambient temperature or higher

Cooling Temperature

Cooling too fast may cause wet spots and cracks. Cooling too slow may cause frosting

Recommended Fragrance Addition 8%-10%

Vegan Friendly pplied in 12.5 kilo blocks and packed in 25

kilo bags with liner
